# Solutions

# From our cloud expert team

## AWS Workload Migration

Seamlessly transfer your applications and data to AWS with the assistance of our expert team.

## Effortless Cloud Infrastructure Management

We handle the deployment, monitoring, and management of your AWS resources for efficient and secure operations.

## DevOps Automation Solutions

Implement automated workflows to streamline application deployment and management, all supported by AWS services and tools.

# From our cloud expert team

## Data Analytics and Machine Learning Capabilities

Leverage AWS for data analytics and machine learning systems that unlock valuable insights and empower machine learning-driven applications.

## Robust Security and Compliance

Safeguard your infrastructure and data with tailor-made security solutions, ensuring compliance with regulatory standards.

## Cost Optimization Strategies

Our team helps you optimize your AWS infrastructure, eliminating unnecessary expenses and ensuring cost-effectiveness.

# From our cloud expert team

## Scalability and High Availability Solutions

Benefit from AWS's scalability and high-performance capabilities to guarantee constant system availability and peak performance.

## Serverless Computing Benefits

Utilize serverless applications built on AWS Lambda and associated services to minimize costs and streamline infrastructure management.

## Custom Application Development Expertise

We specialize in crafting custom applications that precisely meet your business needs, harnessing AWS development services and tools.

## Problems

Our clients is a smart home security provider, they help protect and connect families, businesses and larger commercial client. They faced problems in efficient source code management and Git processes, tracking performance and creating dashboards to monitor projects and systems, developing prototypes and demonstrating multiple solutions for functional business requirements.

## Our solutions

- Automation and git management.
- Build dashboards and performance insights using tools.
- Participate in agile workflows to improve products and services.
- Influence API architecture decisions.
- Maintain API documentation.
- Architect and develop prototypes and demonstrate various alternatives for functional business requirements for a wide audience range.

## Problems

Our client is a prominent healthcare organization. They faced problems with data quality, impeding efficient healthcare management. Additionally, they are also facing challenges related to Data Security, Data Integration, Data Quality Assurance, and Cost Management.

## Our solutions

- Client's Needs Analysis, Solution Design, and Development Leadership.
- Translate Requirements into client-Focused Solutions.
- Collaborate for Coherent Solution Implementation.
- Technical Expertise & Strategic Vision.
- Quality Documentation & Repository Management.
- Resource Coordination & Project Oversight.
- Ensure Service Quality for client Satisfaction.

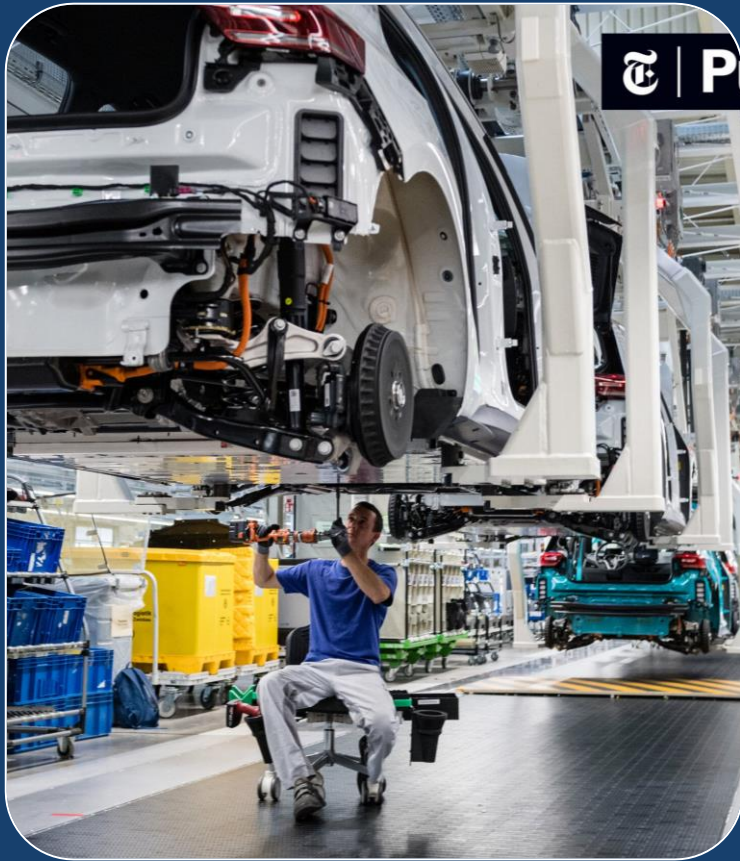

## Problems

Our client is a financial services institution. They faced problems with technology and engineering in the context of digital transformation and innovation, as they seek to build capabilities that enable their organization to thrive with innovation, speed, agility, scalability, and efficiency.

## Our solutions

- Innovative Application Development
- High-Quality Code
- Customer-Centric Collaboration
- Testing Excellence
- Tech Pioneering
- Complex Problem Solving
- Versatile Programming Expertise

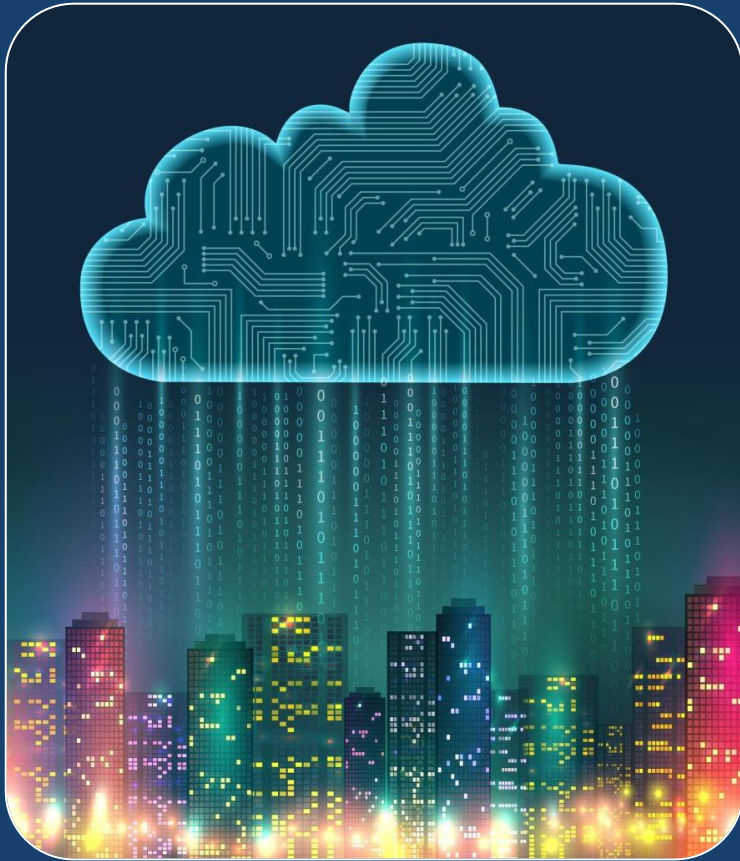

## Problems

Our client is a leading provider of software solutions for the automotive parts and repair industry. They faced challenges in streamlining and optimizing various aspects of their technology infrastructure, including server, storage, virtualization, and cloud technologies. Their goal is to enhance the efficiency and functionality of their solutions, ensuring high availability and scalability.

## Our solutions

- Infrastructure Excellence
- Technical Support and Expertise
- Software Maintenance and Upgrades
- Collaborative Efforts
- Technology Stewardship
- Continuous Innovation
- Policy and Procedure Enhancement
- Proactive Monitoring and Response
- Infrastructure as Code (IaC)
- Scripted Automation

## Problems

Our client is a company dedicated to transforming businesses and careers in the real estate industry. They face the challenge of matching unique experiences with fulfilling careers, helping individuals realize their potential and foster career growth within real estate. They seeks a partner who can be themselves, advocate for others, remain adaptable, dream big, take ownership of outcomes, and think globally while acting locally.

## Our solutions

- Reliable Recovery, Backup and Recovery Support
- Cloud Operating Model, Security-First Standards
- Engineer Coaching and Innovation, Quality Architecture
- Technical Deliverables, Unit Testing, ITIL and SRE Expertise
- Technology Risk Assessment, Documentation and Compliance
- Progress Monitoring, Automation and CI/CD Pipeline
- Technical Assessments and Solutions
- Security Compliance, Operational Efficiency
- Asset Management, Problem Resolution
